## 1 Care map information

Quick info:

**In scope:**

- investigation, diagnosis

## 2 Information and resources

Quick info:

**Information resources for people and carers:**

- [The New Zealand Gynaecological Cancer Foundation](#)
- [Cancer Society \(NZ\)](#)
- [Gynaecology Cancers - Information for all Women](#)

**Information resources for clinicians about vulval cancer:**

- rare – accounts for about 5% of [1] gynaecological malignancies
- increased incidence with age – most patients present aged > 65 years
- HPV associated in many cases
- 90% are squamous cell carcinomas
- others include basal cell carcinomas, adenocarcinomas, sarcomas, melanomas [1]

Reference:

1. Royal College of Obstetricians and Gynaecologists. Guidelines for the Diagnosis and Management of Vulval Carcinoma. British Gynaecological Cancer Society 2014.

## 3 Updates to this care map

Quick info:

Date of publication December 2017

Review date: December 2018

This care map has been developed in line with consideration to evidenced based guidelines. For further information on contributors and references please see the Pathway's Provenance Certificate.

NB: This information appears on each page of this care map.

## 4 Hauora Maori

Quick info:

Maori are a diverse people and whilst there is no single Maori identity, it is vital practitioners offer culturally appropriate care when working with Maori whanau. It is important for practitioners to have a baseline understanding of the issues surrounding Maori health. This knowledge can be actualised by (not in any order of priority):

- considering the importance of introductions ('whanaungatanga') - a process that enables the exchange of information to support interaction and meaningful connections between individuals and groups. This means taking a little time to ask where this person is from or to where they have significant connections
- asking Maori people if they would like their whanau or significant others to be involved in assessment and treatment
- asking Maori people about any particular cultural beliefs they or their whanau have that might impact on assessment and treatment of the particular health issues

### **Maori health services**

HBDHB contracts Maori health providers to deliver community based nursing and social support services. Practitioners should discuss, where appropriate, information about relevant Maori health services. A referral to one of these providers may assist Maori people to feel more comfortable about receiving services following discussions.

### **Central Hawke's Bay:**

## 5 Pasifika

### Quick info:

Pacific people value their culture, language, families, education and their health and wellbeing. Many Pacific families have a religious affiliation to a local church group.

The Pacific people are a diverse and dynamic population:

- more than 22 nations represented in New Zealand
- each with their own unique culture, language, history, and health status
- share many similarities which we have shared with you in order to help you work with Pacific people more effectively
- for many families language, cost and access to care are barriers

Pacific ethnic groups in Hawke's Bay include Samoa, Cook Islands, Fiji, Tonga, Niue, Tokelau, Kiribati and Tuvalu. Samoan and Cook Island groups are the largest and make up two thirds of the total Pacific population. There is a growing trend of inter-ethnic relationships and New Zealand born Pacific populations.

Acknowledge [The FonaFale Model](#) (Pacific model of health) when working with Pacific people and families.

General guidelines when working with Pacific people and families (information developed by Central PHO, Manawatu):

- [Cultural protocols and greetings](#)
- [Building relationships](#) with your Pacific people
- [Involving family support and religion](#) during assessments and in the hospital
- [Home visits](#)

### Hawke's Bay-based resources:

- [HBDHB interpreting service website](#) or phone 06 8788 109 ext. 5805 (no charge for the hospital; charges may apply for community-based translations) or contact coordinator at [interpreting@hbdhb.govt.nz](mailto:interpreting@hbdhb.govt.nz)
- Pacific Navigation Services Ltd Phone: 027 971 9199
- services to assist Pacific people to access healthcare ([SIA](#))
- [Improving the Health of Pacific People in Hawke's Bay](#) - Pacific Health action Plan

### Ministry of Health resources:

- [Primary Care for Pacific people](#): a Pacific and health systems approach
- Health education resources in [Pacific languages](#) (links to a web page where you can download resources)

## 6 Advance care planning

### Quick info:

#### Advance Care Planning:

Advance Care Planning is a voluntary process of discussion and shared planning for future health care. It involves the person who is preparing the plan, and usually involves family/whanau and health care professionals.

#### Advance Care Plan:

An Advance Care Plan is the outcome of Advance Care Planning. It is formulated by the person and sets out their views about care towards the end of their life. It may also include views about medical care and a wide range of other matters. An Advance Care Plan may include an Advance Directive.

#### Advance Directive:

An Advance Directive is a statement a person makes about their medical care in the future and becomes effective if a person ceases to be competent to make decisions for themselves. An Advance Directive is legally binding if made in appropriate circumstances.

#### Competency and Advance Care Planning:

Competent people have the right to make autonomous decisions that as medical professionals we may regard as imprudent, and sometimes such decisions are a reflection of the person's longstanding personality, beliefs or lifestyle. This right is described in the Health and Disability Consumers Rights Acts.

According to ACP - A Guide for the NZ Health Care Workforce - "in the context of ACP, competency relates to an individual's ability to make a decision regarding their own health care (that is, competence at decision-making or decision-capacity). At a minimum, decision making capacity requires the ability to understand and communicate, to reason and deliberate, and the possession of a set of values".

## 7 Faster Cancer Treatment time frames

Quick info:

[Ministry of Health Faster Cancer Treatment \(FCT\)](#) timeframes: FCT is a person's pathway approach to ensuring timely clinical cancer care and is measured by the following agreed indicators:

- for people referred urgently with a high suspicion of cancer they receive their first cancer treatment (or other management) within 62 days
- for people referred urgently with a high suspicion of cancer they have their first specialist assessment within 14 days
- for people with a confirmed diagnosis of cancer they receive their first cancer treatment (or other management) from decision-to-treat within 31 days
- [Faster Cancer Treatment: High suspicion of cancer definitions April 2016](#)

## 8 RED FLAGS!

Quick info:

**Red Flag Symptoms:**

- rapidly growing genital lump
- irregular or fungating vulval lesion
- irregular or non-healing vulval ulcer
- vulval lesion with associated groin lymphadenopathy

**Refer to Gynaecology services via form. An example of the [form](#). Fax the form to outpatient referral centre 06 878 1328**

The urgent referral for Suspected Gynaecological Cancer form can be found in the Patient Management system as an outbox document.

## 9 Vulval Symptoms

Quick info:

**Symptoms / signs:**

- itching, burning and soreness of the vulva
- a lump, swelling or wart-like growth:
  - new wart in post-menopausal person
  - persistent wart despite treatment in pre-menopausal person
- thickened, raised, red, white or dark
- patches on the skin of the vulva
- vulval pain
- vulval bleeding
- vulval sore/ulcer
- a mole on the vulva that changes shape or colour
- any new mole on the vulva

## 10 Risk Factors

Quick info:

**Risk Factors:**

# Vulval Cancer Suspected

Oncology > Oncology > Vulval Cancer Suspected

- vulval intra-epithelial neoplasia (VIN):
    - premalignant condition with 4% risk of becoming invasive cancer
    - diagnosed by biopsy
    - can develop:
      - spontaneously
      - as progression from lichen sclerosus
      - as progression from squamous cell hyperplasia
    - there are two types:
      - "Usual" or "Classical" VIN is associated with HPV and tends to affect younger women
      - un "Differentiated" VIN tends to arise from chronic dermatological conditions e.g. lichen sclerosus and affects older women
  - smoking
  - HPV infection
  - lichen sclerosus has a 4% chance of becoming invasive
  - Paget's disease – adenocarcinoma in situ
  - melanoma in situ
  - immunodeficiency
- NB:** Risk increases with age.

## 11 History

Quick info:

Check person's history:

- previous vulval dermatoses/VIN, especially Lichen sclerosus
- prolonged skin conditions
- past gynaecological history
- past smear history
- any other relevant clinical information
- duration of symptoms
- history of any previous treatments tried and effectiveness
- previous HPV infections

## 12 Level of understanding and engagement

Quick info:

1. Apply health literacy principles

Ask what the person understands:

- build on what the person already knows
- translate medical terminology into lay language
- draw diagrams or write key phrases and messages down and give it to the person to take with them
- provide educational material
- check the person's understanding to confirm that they understand the key messages
- encourage the person to bring trusted support people to future consultations
- consider other health literacy resources as appropriate:
  - Interpreter Services – Language Line (Nationwide) 0800 656 656 Monday to Friday, 9am to 6pm, and Saturday 9am to 2pm
  - maori navigational services
  - pasifika health services
  - cancer nurse coordination services

# Vulval Cancer Suspected

Oncology > Oncology > Vulval Cancer Suspected

- cancer society
- [LETS PLAN](#) is a resource to help plan your next health care visit. It will help you understand more about your health and treatment for an illness or injury

2. Consider any barriers to effective care:

- complexity of cancer care pathway – not knowing when or where to go next
- whanau, family and social network dynamics
- whanau support, family history
- family obligations including dependents
- work responsibilities
- whanau, hapu, and iwi obligations
- community engagement and obligations or responsibilities
- locality and geographical access to health and hospital services
- socio-economic factors, including source of income

## 13 Examination

Quick info:

**Examination:**

- examine the person, 75% of vulval cancer occurs on the labia
- look for:
  - altered pigmentation i.e. white, grey, red, or darkened skin
  - thickened skin, a raised lump or lesion, particularly if it is irregular, exophytic, warty
  - bleeding lesion

## 14 Consider differential diagnosis

Quick info:

Consider differential diagnosis:

- Behcet syndrome
- boil, sebaceous cyst, Bartholin's abscess, or urethral caruncle
- Crohn disease
- dermatitis, psoriasis, eczema
- fungal infection
- herpes simplex
- lichen planus
- syphilis
- dermatoses

## 15 Urgent referral to Gynaecology services

Quick info:

Refer to Gynaecology services via form. An example of the [form](#). Fax the form to outpatient referral centre 06 878 1328

The urgent referral for Suspected Gynaecological Cancer form can be found in the Patient Management system as an outbox document.

Include relevant information:

- reason for referral
- expectation of referral
- history and co-morbidities

# Vulval Cancer Suspected

Oncology > Oncology > Vulval Cancer Suspected

- current management and/or options already pursued
- examination findings
- investigation results
- current medication
- allergies and adverse drug reactions
- any other relevant clinical information

If clinically unstable refer to Emergency Department and phone Oncall O & G registrar via HBDHB switchboard 06 878 8109

NB: Refer to gynaecological services do not wait for smear results

Referral will not be accepted unless the form has been completed. The person will be seen within two weeks.

## 16 Investigation

Quick info:

Investigation:

- consider punch biopsy prior to referral for lesions of uncertain diagnosis
- consider testing for ulcerative STI disease
  - herpes, syphilis etc

## 17 Support services

Quick info:

**Support services:**

1. Gynaecology Clinical Nurse Specialist can improve the experience for people including:

- their family and whanau, with cancer or suspected cancer
- they also help improve overall access and timeliness of access to diagnostic and treatment services for patients with cancer
- Contact:
  - Attention: HBDHB Gynaecology Clinical Nurse Specialist Private Bag 9014 Hastings
  - Phone 06 878 8109 ext 6315 Mobile 027 3535 298

2. Cancer Society:

- [an information guide for women with gynecological cancer](#)
- for additional support services phone the cancer information nurses on the Cancer Information Helpline 0800 226 237
- [referral](#) Referral can be made before a diagnosis as Cancer Society also offers support for diagnosis treatment

3. [Central Region Cancer Services Directory](#)

This directory provides a list of some of the cancer support services available in Hawke's Bay including:

- accommodation
- disability support
- government health services
- medication
- legal advice
- ethnic and cultural

4. Check the Hauora Maori and Pasifika nodes for further information on available support services.

## 18 Refer to Gynaecology services

Quick info:

Include relevant information:

- reason for referral
- expectation of referral

Published: 15-Dec-2017 Valid until: 30-Jun-2019 Printed on: 17-Sep-2018 © Map of Medicine Ltd

## 19 Secondary care clinic

Quick info:

Discuss appropriate management plan with the woman.

A clinic letter to be written to the referrer/GP indicating the outcomes and a planned approach of ongoing care (transfer of care).

NB: If the woman has been advised that she has cancer then a urgent letter is sent to the GP.

## 20 Cancer diagnosis

Quick info:

Discuss appropriate management plan with the woman.

Clinic outcome letter to GP.

NB: If the woman has been advised that she has cancer then a urgent letter is sent to the GP.

## 21 Non-Cancer diagnosis

Quick info:

Discuss appropriate management plan with the woman.

Clinic outcome letter to GP.

## 22 Tertiary Care Intervention

Quick info:

Tertiary Care Intervention as plan management following FSA visit

## 23 Secondary care intervention

Quick info:

Secondary Care Intervention as plan management following FSA visit.

## 24 Discharge back to Primary care

Quick info:

A letter to be written to the referrer indicating the outcomes and a planned approach of ongoing care (transfer of care).

A phone call to the referrer is preferred when there are short time frames for care planning/ intervention.

## 25 Ongoing Supportive Care

Quick info:

The aim of supportive care is to provide the person with the best quality of life possible so that they are able to participate in their treatment to maximise comfort and eliminate suffering.

- breast services
- ethnic and cultural
- accommodation
- disability support
- government health services
- medication
- legal advice

## Provenance Certificate

### Vulval Cancer – Suspected

#### Overview

This document describes the provenance of Hawke's Bay Region Gynaecological Cancer Pathways.

The purpose of implementing cancer pathways in our District is to:

- Reduce barriers so that all people with cancer are able to access the same quality care within the same timeframes, irrespective of their ethnicity, gender, locality or socio-economic status
- Achieve the faster cancer treatment (FCT) health target – 85% of patient receive their first cancer treatment (or other management) within 62 days of being referred with a high suspicion of cancer and a need to be seen within two weeks by July 2016, increasing to 90% by June 2017
- Implement the national tumour standards of service provision, developed as part of the FCT programme, to support the delivery of standardised quality care for all people with cancer
- Improve equity along the cancer pathway
- Clarify expectations across providers
- Improve communications and follow up care for cancer patients

#### To cite these pathways, use the following format:

Map of Medicine – Hawke's Bay View / Oncology /Gynaecological / Vulval Cancer – Suspected

#### Editorial methodology

This care map has been based on a Map of Medicine Care Map developed according to the Map of Medicine editorial methodology. The content of the Map of Medicine care map is based on high quality guidelines and practice-based knowledge provided by contributors with front-line clinical experience (see contributors section of this document). This localised version of the evidence-based, practice informed care map has been peer-reviewed by the HBDHB and Collaborative Clinical Pathways Director and with stakeholder groups.
